

MAINTENANCE & SPECIALTY CHEMICALS

Hydro-Zone's Industrial & Specialty Chemicals Division contains a wide range of Industrial, Maintenance, Food Sanitation and Specialty Chemicals. Hydro-Zone's representatives have over 50 years experience in the chemical market place. Hydro-Zone representatives will examine your operations and design a program that is specifically for your facility. This process to make your facility operate more efficiently is a 3 step approach.

The process begins by surveying the plant operations, production cleaning and cleaning procedures. We will review your parts cleaning, equipment cleaning, floor cleaning, water treatment program, and any other facility maintenance processes to determine what is important to the facilities improvement.

With these surveys, Hydro-Zone can design a Chemical Program to improve your plant productivity, cleanliness, and safety. We offer a variety of cleaners and degreasers for all of your operational needs.

After designing a customized program to maintain your facilities, Hydro-Zone will train and educate your Employees on the best practices to gain optimal results from the products your facility uses. We will also train your employees on safety training and standard operating procedures.

INDUSTRIAL PRODUCT LINE

- Liquid Aqueous Cleaner
- Powdered Aqueous Cleaners
- Semi-Aqueous Cleaners
- Organic Solvents
- Paint Strippers
- Rust Inhibitors
- Coolants & Lubricants
- Phosphate Coating Chemicals
- E-Coat Chemicals
